e-SLOG 2.0 Electronic Invoice – Part 2: Document Composition

Rights and contacts

e-SLOG is a trademark of the Chamber of Commerce and Industry of Slovenia. e-SLOG 2.0 Electronic Invoice documentation was prepared by the ROSE "Readiness Of Slovenian E-Invoicing" Action no 2016-SI-IA-0103, which is co-financed by the European Union's Connecting Europe Facility (CEF). The documentation was implemented as milestone no. 2 "Manual for eSLOG 2.0 ready" of Activity 1 "Upgrade of the Slovenian national eInvoicing standard eSlog 1.6 to 2.0". The sole responsibility of this publication lies with the author. The European Union is not responsible for any use that may be made of the information contained therein. e-SLOG 2.0 Electronic Invoice documentation is published at <http://www.roseslovenia.eu/>.

Users are permitted to use all the published materials for the purposes of electronic commerce. Their use is free of charge. Editing the contents of the schemas is not permitted.

The Chamber of Commerce and Industry of Slovenia and the partners who participated in the ROSE project for the preparation of e-SLOG 2.0 standard shall not assume any direct or indirect liability for any damage caused by the use of the e-SLOG 2.0 standard.

Members of the working group for the preparation of e-SLOG 2.0 Electronic Invoice Documentation:

Dušan Zupančič (CCIS), Alan Ružič (ZZI), Rok Bojanc (ZZI), Tomaž Močnik (ZZI), Jorgo Bertalanič (PPA), Rok Bojkovič (Mojdenar IT).

Foreword

The e-SLOG 2.0 Electronic Invoice documentation was prepared by the ROSE "Readiness Of Slovenian E-Invoicing" project.

This document is part of a group of documents, consisting of:

- e-SLOG 2.0 Electronic Invoice – Part 1: General Instructions
- e-SLOG 2.0 Electronic Invoice – Part 2: Document Composition
- e-SLOG 2.0 Electronic Invoice – Part 3: Examples of Use

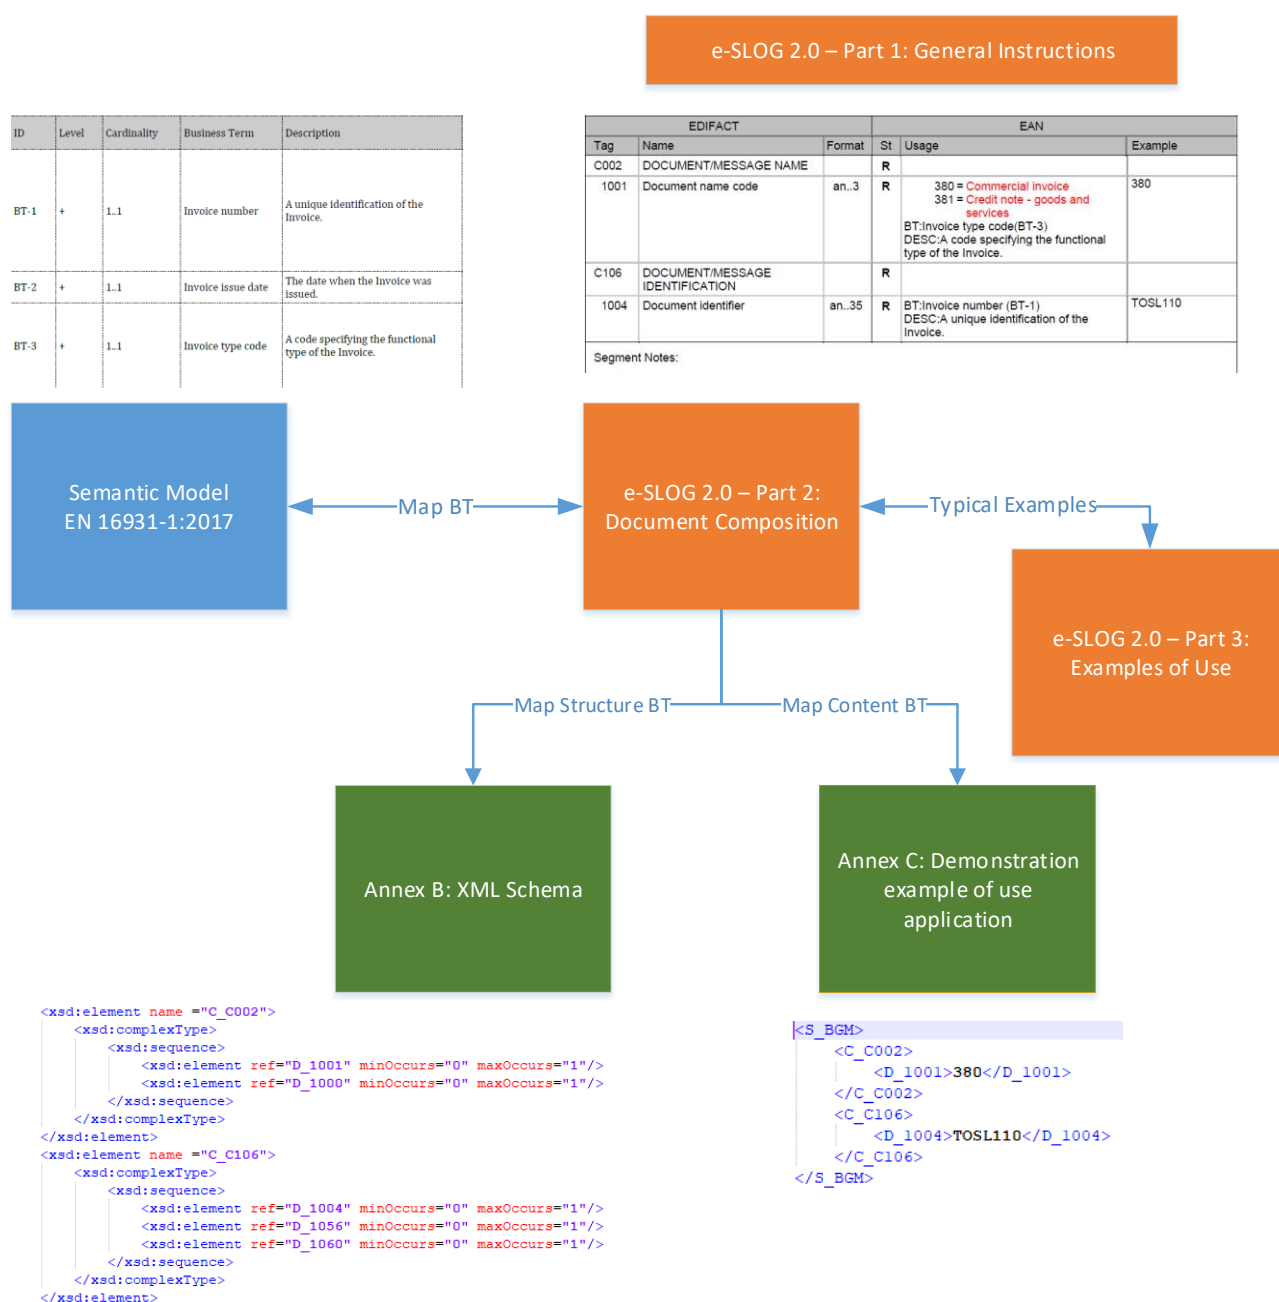

Figure 1: Link between the e-SLOG 2.0 electronic invoice documents

Introduction

On 6 May 2014, the European Parliament and the Council adopted Directive 2014/55/EU on establishing the EN 16931 electronic invoicing standard. The European standard was published in the Official Journal of the European Union on 17 October 2017.

The ROSE "Readiness Of Slovenian E-invoicing" measure was established in order to introduce the European electronic invoicing standard in the Slovenian public sector and in the economy. One of the fundamental objectives of the measure is to upgrade the e-SLOG standard to the 2.0 version, which is in line with the European standard. In the preparation of the e-SLOG 2.0 standard, UN/EDIFACT INVOIC syntax was used as a basis, the same as in the preparation of the previous e-SLOG standard versions.

Interoperability between the old e-SLOG 1.6 standard and the new e-SLOG 2.0 standard is provided by mapping tables, which enable mapping between the two standards. The mapping tables can be found in Annex D to the document *e-SLOG 2.0 Electronic Invoice – Part 2: Document Composition*.

The e-SLOG 2.0 October 2018 version contains the national extensions. National extensions were prepared by the e-SLOG working group at the Chamber of Commerce and Industry of Slovenia.

1 Scope

The purpose of the document is to provide composition of the document e-SLOG 2.0 – Electronic invoice and the connection of individual segments of the document with a semantic model described in SIST EN 16931-1:2017 [2]. It is intended for all legal and public persons implementing e-SLOG 2.0 0 – Electronic invoice into their software solutions.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

SIST EN 16931-1:2017 Electronic Invoicing – Part 1: Semantic data model of the core elements of an electronic invoice.

3 Terms and definitions

For the purposes of this document, the terms and definitions from *e-SLOG 2.0 Electronic Invoice – Part 1: General Instructions* shall apply.

Annex A contains a list and description of business terms.

4 Message structure chart

The message is composed by segments. The structure of the message is explained in *e-SLOG 2.0 Electronic Invoice - Part 1: General Instructions*, Chapter 8.3.1. Each segment is defined by segment code, serial number in documentation, obligation to enter segment¹, number of repetitions, segment name, and relationship with other segments.

6 Segment details

Each segment is described by the elements and the directions for the use of these elements. The links to the business terms (BT) of the semantic model and the case value from the demonstration example of use² are listed. Displayed information is described in the document *e-SLOG 2.0 Electronic Invoice – Part 1: General Instructions*, Chapter 8.3.3.

Segment number: 1

UNH - M 1 - Message header					
Function: To head, identify and specify a message.					
Notes: 1. Data element S009/0057 is retained for upward compatibility. The use of S016 and/or S017 is encouraged in preference. 2. The combination of the values carried in data elements 0062 and S009 shall be used to identify uniquely the message within its group (if used) or if not used, within its interchange, for the purpose of acknowledgement.					
e-SLOG 2.0			EN 16931

7 Consolidated invoice

A consolidated invoice means that the invoice is linked to multiple delivery locations and / or multiple orders and / or multiple deliveries. Standard EN 16931-1 specifies that the one invoice can only relate to one delivery and one order. In Slovenia, the so-called consolidated invoice takes into account different relationships. The rules and constraints for supporting consolidated invoices are described in *e-SLOG 2.0 Electronic invoice - Part 1: General instructions*, chapter 7.2.5.

General requirements for the preparation of consolidated invoices:

- the account type (BT-3) value for consolidated invoices is 385 (EDIFACT standard, Consolidated invoice),
- if the supplies relate to a period of several days, the BT-72 (Actual delivery date) includes the delivery note data (Delivery number + delivery date + delivery date),
- the date of the order can be entered.

Two methods of consolidated invoice are supported:

- the data of deliveries and orders at the level of the invoice header,
- the data of deliveries and orders at the level of the invoice line item.

The issuer can choose one of the supported methods or a combination of both (for example, in the case of one order and multiple deliveries, the order data can be written in the invoice header, and the supply data is written on the invoice line items).

7.1 The delivery and order data at the level of the invoice header

This method is appropriate in the case where the invoice items refer to the same (one) location, and items are difficult to link to individual orders (if case of multiple orders).

- In case the multiple deliveries are indicated on the header of the invoice, BT-16 (Despatch advice reference) is repeated several times.
- In case the multiple orders are indicated on the header of the invoice, BT-13 (Purchase order reference) is repeated several times .

An example for multiple deliveries:

```

      </C_C507>
    </S_DTM>
  </G_SG1>
```

The listing of multiple locations in the invoice header is possible, but the use is not advisable because it makes it difficult to make a transparent connection between the number of supplies, orders and locations of delivery. If it is still necessary to record several different delivery locations in the invoice header, they can be indicated by repeating DELIVER TO ADDRESS (BG-15). Otherwise, it is recommended to use the method for orders, deliveries and delivery locations at the level of the invoice line item.

An example of two delivery locations in the invoice header:

```
<G_SG2>
  <S_NAD>
    <D_3035>DP</D_3035>
    <C_C082>
      <D_3039>579000436070</D_3039>
      <D_1131>0088</D_1131>
    </C_C082>
    <C_C080>
      <D_3036>Logistic service ltd</D_3036>
    </C_C080>
    <C_C059>
      <D_3042>Delivery street</D_3042>
      <D_3042_2>Gate 15</D_3042_2>
      <D_3042_3>Floor 2</D_3042_3>
    </C_C059>
    <D_3164>Delivery city</D_3164>
    <C_C819>
      <D_3228>Jutland</D_3228>
    </C_C819>
    <D_3251>9000</D_3251>
    <D_3207>DK</D_3207>
  </S_NAD>
</G_SG2>
<G_SG2>
  <S_NAD>
    <D_3035>DP</D_3035>
    <C_C082>
      <D_3039>579000436070</D_3039>
```

```

        <D_1131>0088</D_1131>
    </C_C082>
    <C_C080>
        <D_3036>Logistic service ltd</D_3036>
    </C_C080>
    <C_C059>
        <D_3042>Delivery street 2</D_3042>
        <D_3042_2>Gate 30</D_3042_2>

    </C_C819>
    <D_3251>9001</D_3251>
    <D_3207>DK</D_3207>
</S_NAD>
</G_SG2>

```

7.2 The delivery and order data at the level of the invoice line item

This method is recommended, especially when the invoice includes multiple deliveries and/or orders to different locations, since it enables the connection between the location, the order number and the delivery number.

A delivery note is indicated on each line item. The delivery number is written in BT-16 but within the `<G_SG30>` segment.

Example of a delivery note at the level of line item:

```

    <G_SG30>
        <S_RFF>
            <C_C506>
                <D_1153>AAK</D_1153>
                <D_1154>5433</D_1154>
            </C_C506>
        </S_RFF>
        <!--delivery note date-->
        <S_DTM>
            <C_C507>
                <D_2005>171</D_2005>
                <D_2380>2018-03-10</D_2380>
            </C_C507>
        </S_DTM>
        <!--delivery date-->
        <S_DTM>
            <C_C507>
                <D_2005>35</D_2005>
                <D_2380>2018-03-10</D_2380>
            </C_C507>
        </S_DTM>
    </G_SG30>

```

The order number is indicated on each line item. The order number is written in BT-13 but within the `<G_SG30>` segment.

Example of a order at the level of line item:

```

    <G_SG30>
        <S_RFF>
            <C_C506>
                <D_1153>ON</D_1153>
                <D_1154>541133</D_1154>
            </C_C506>

```

e-SLOG 2.0 Electronic Invoice – Part 2: Document Composition

```
</S_RFF>
<!--order date-->

<S_DTM>
<C_C507>
  <D_2005>171</D_2005>
  <D_2380>2018-03-12</D_2380>
</C_C507>
</S_DTM>
</G_SG30>
```

The delivery location is indicated on each line item. The delivery location is written in BT-15 (Deliver to address) but within the `<G_SG35>` segment.

Example of a delivery location at the level of line item:

```
<G_SG35>
  <S_NAD>
    <D_3035>DP</D_3035>
    <C_C082>
      <D_3039>579000436070</D_3039>
      <D_1131>0088</D_1131>
    </C_C082>
    <C_C080>
      <D_3036>Logistic service ltd</D_3036>
    </C_C080>
    <C_C059>
      <D_3042>Delivery street 2</D_3042>
      <D_3042_2>Gate 30</D_3042_2>
      <D_3042_3>Floor 1</D_3042_3>
    </C_C059>

Annex B
(informative)

e-SLOG 2.0 Schema

B.1 XML Schema

The current e-SLOG 2.0 .XML document schema is available on the link:

http://www.roseslovenia.eu/e_files/news/eSLOG20_INVOIC_v200.xsd.

Annex C
(informative)

Demonstration example of use application

C.1 An example of using segment elements

In Chapter 6, an example of use is given for individual segment elements. An example of use of the e-SLOG 2.0 document, which contains all of the above examples of elements, is available on the link:

http://www.roseslovenia.eu/e_files/news/sample_eSLOG20_INVOIC_v200.xml.

Annex D
(informative)

Mapping table e-SLOG 1.6

D.1 Mapping table between e-SLOG 1.6 and e-SLOG 2.0

The interoperability between e-SLOG 1.6 and e-SLOG 2.0 is supported by mapping tables that translate elements between the two standards.

Mapping table that translate from e-SLOG 1.6 to e-SLOG 2.0, is available on the link:

http://www.roseslovenia.eu/e_files/news/map_eSLOG16_eSLOG20.xlsx.

Mapping table that translate from e-SLOG 2.0 to e-SLOG 1.6, is available on the link:

http://www.roseslovenia.eu/e_files/news/map_eSLOG20_eSLOG16.xlsx.
